Assingment 2: Drive me on!

Group #: 4
Grade: 90

Item	Description	Percentage	Grade	Comments
Yocto meta-layer	Correct creation of the meta-tec layer.	10	10	
Yocto recipes	Correct creation of the recipes: recipes-kernel/conv-mod and recipes-app/conv-app	15	15	
Git control versioning	The delivery is correctly made using a git repository with the layout suggested and following the required work flow.	10	10	
Getopt implementation	Correct usage of getopt for the command lines options	5	5	
Application and module implementation and functionality	The application/driver meets with the requirements proposed and is totally functional providing the correct image conversion.	50	50	- Good code! - Try to use some standard indentation tool. - Anything commented should not be on the final release. - It is not recommended to separate open/close calls in different functions, this may lead to leave some open devices or lost control under software exceptions.
Documentation	PDF report	10	0	No report found.
